Overview

Students will use classroom digital cameras to take pictures of 10 interesting objects that they can connect with themselves then upload them to their google drive to be used later in a presentation.

Grade Level: K-5
Materials: digital cameras, computer work stations, cables

Students will have prior knowledge in the use of google drive/docs and how to login and access these features.

Tell students they must find 10 objects that they find interesting and will be able to describe as being like themselves in someway. Give them 15-30 min to explore the classroom/playground/school to take pictures.   When they return use a camera that you have taken some pics on and demonstrate the process of uploading them to google drive.

Have students go to their computer and follow along upload their pictures as you repeat the demonstration of uploading pictures.   students will upload their pics to their google drive as well as to the folder that is created for the classroom.

	1	**2**	**3**
	Student needs more than 50% assistance in uploading pictures by following teacher directions.	Student needs 25-50% assistance in in uploading pictures by following teacher directions.	Student attends to lesson and is able to successfully in upload pictures by following teacher directions.
